

HDPE SEMI RIGID SELF SUPPORTING HOSE CONDUCTIVE HOSE (EL)

Temp. : -20°C to +70°C

Structure:

HDPE wall with interlock design without reinforcement

Properties:

self-supporting
superior resistance to alkalis and acids
simply increase or decrease the size
jointing of lengths
able to maintain shape
electrical and surface resistance $\leq 10^6 \Omega$

Applications:

Air and fume extraction specially in electronics, electrical, welding, chemical industries.

Portable air conditioner venting hose.

Also for conveyance of wood dust, powder and plastic granule.

Temperature range:

-20°C to 70°C

Colour:

Black

Standard Length :

10 meter
